

Devon Lewis

Web Developer / Software Engineer

1050 N Ogden St | Denver, CO 80218 | 661-718-6975

devonlewis808@gmail.com | www.devonlewis.carbonmade.com

Versatile Front-end developer with 3+ years of experience designing, developing and managing rich web applications. Specialized in JavaScript, React, Angular and responsive design. Strives to identify areas of improvements in the code base and help contribute in refactoring for efficiency. Solid understanding of writing modular and maintainable code and experienced in HTML, CSS, JavaScript and is an active GitHub contributor.

EDUCATION

Boston University - *Master's Degree, Web Application Development*

University of California, Santa Barbara - *Bachelor's Degree, Communications*

FREELANCE EXPERIENCE

Conaxion Inc, Remote - *Full Stack Developer*

AUGUST 2019 - PRESENT

- Experience building Conaxion Inc's online freelance student platform. The Web Application aims to provide students with professional experiences within their field of study.
- Used React Library and Redux in the app for a comprehensive means of managing state within the JavaScript Application.
- Designed dynamic and web compatible pages using HTML5, CSS, JavaScript and React 16.
- Developed fetch services for the backend REST API and mapped them to the frontend using React 16 to display lists and content unique to each user.
- Responsible for Client-Side UI Validation and Business Logic implementation based on user selection using React 16.
- Responsible for initiating, planning, constructing, executing, monitoring and controlling the deployment of the web application.
- Worked closely with production owners to understand application requirements and implement new requirements through iterations.
- Environment: VSCode

"Mastering Me" Website, Remote - *Web Master*

MARCH 2020

- Experience building a website for author Tashuna Scott's book "Mastering Me".
- Helped increase physical book sales by providing a unique platform for customers to purchase her book.
- Designed dynamic and web compatible pages using HTML5, CSS and JavaScript.
- Used GoDaddy's servers as a means of hosting and FileZilla as a means of file management.

SKILLS

Seasoned email marketer, designer, and developer with over nine years experience in the email marketing industry. Has a strong knowledge of lifecycle marketing, customer journey strategy, industry best practices, CAN-SPAM compliance, HTML5/CSS3, automation build, audience segmentation, and more.

RECENT WEB PROJECTS

Trip Calculator Application <https://fathomless-fortress-87754.herokuapp.com/>

REACT, REDUX, JAVASCRIPT, HTML, CSS

A responsive, single page application that estimates how much surplus money users will have each month. This calculation is based on the users monthly expenses and income. It's minimal interface allows for the input and deletion of recurring and non-recurring expenses after a user has registered.

Surplus Budget Application <https://surplus-devon-lewis.herokuapp.com/>

EXPRESS JS, HANDLEBARS, NODE JS, JAVASCRIPT, HTML, CSS

A responsive, single page application that estimates how much surplus money users will have each month. This calculation is based on the users monthly expenses and income. It's minimal interface allows for the input and deletion of recurring and non-recurring expenses after a user has registered.
