PROFESSIONAL EXPERIENCE

Front End Developer – Trip Calculator

TECHNOLOGIES: REACT, HTML5, CSS & JS   2020-Present

Developed the Web Application Trip Calculator as a means of easily calculating how much money each participant of a trip owes each other participant. The application uses a simple UI/UX that intuitively guides users to a results page where they can view a breakdown of costs among each participant.

Full Stack Developer – Surplus

TECHNOLOGIES: HTML5, CSS3, JS, NODEJS & MONGODB   2019-2020

Created the application Surplus which uses a simple formula that estimates how much surplus money you will have at the end of each month after you pay your bills.

Full Stack Developer – Gym Log

TECHNOLOGIES: HTML5, CSS3, JS, ANGULAR, TYPESCRIPT, NODEJS & MONGODB   2018-2019

Created an application that allows its user to log workouts and filter them based on date or workout title. Within this application, users can log their workouts and create customized routines that can be saved and edited for viewing at a later date.

Front End Developer – Denver Mock Programming Job Meetup

TECHNOLOGIES: HTML5, CSS3, JS, ANGULAR, TYPESCRIPT & MATERIAL   2018-2019

Denver Mock Programming Job Meetup involved a group a volunteer front-end and back-end engineers with the goal of updating a legacy application. My role required building the front end components of the application primarily with Angular framework.

EDUCATION

Masters Degree Completed – Web Application Development

BOSTON UNIVERSITY   August 2015 - October 2018
